Recevoir des actions ajouter, modifier et annuler

Je canalise les actions à travers un SWITCH et J'évalue que les actions d'Ajouter, Modifier et Annuler fonctionnent :

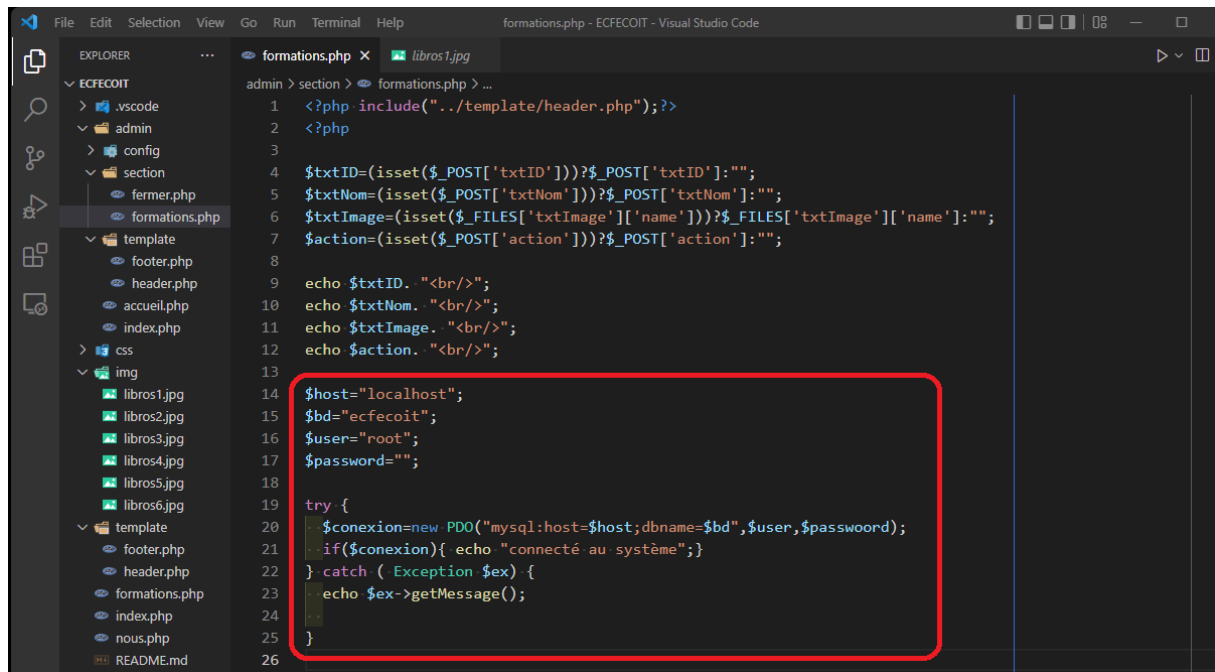

```
1 <?php include("../template/header.php");?>
2 <?php
3
4 $txtID=(isset($_POST['txtID']))?$_POST['txtID']:"";
5 $txtNom=(isset($_POST['txtNom']))?$_POST['txtNom']:"";
6 $txtImage=(isset($_FILES['txtImage']['name']))?$_FILES['txtImage']['name']:"";
7 $action=(isset($_POST['action']))?$_POST['action']:"";
8
9 echo $txtID. "<br/>";
10 echo $txtNom. "<br/>";
11 echo $txtImage. "<br/>";
12 echo $action. "<br/>";
13
14
15
16 switch($action){
17
18     case "Ajouter":
19         echo "Appuyé sur le bouton Ajouter";
20         break;
21     case "Modifier":
22         echo "Appuyé sur le bouton Modifier";
23         break;
24     case "Annuler":
25         echo "Appuyé sur le bouton Annuler";
26         break;
27 }
28
29
```

CONFIGURATION DE LA BASE DE DONNÉES

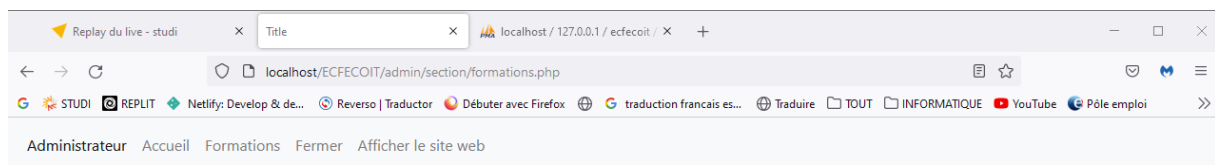

Création de la table et de la base de données :

```
1 <?php include("../template/header.php");?>
2 <?php
3
4 $txtID=(isset($_POST['txtID']))?$_POST['txtID']:"";
5 $txtNom=(isset($_POST['txtNom']))?$_POST['txtNom']:"";
6 $txtImage=(isset($_FILES['txtImage']['name']))?$_FILES['txtImage']['name']:"";
7 $action=(isset($_POST['action']))?$_POST['action']:"";
8
9 echo $txtID. "<br/>";
10 echo $txtNom. "<br/>";
11 echo $txtImage. "<br/>";
12 echo $action. "<br/>";
13
14 $host="localhost";
15 $bd="ecfecoit";
16 $user="root";
17 $password="";
18
19 try {
20     $conexion=new PDO("mysql:host=$host;dbname=$bd",$user,$password);
21     if($conexion){ echo "connecté au système";}
22 } catch ( Exception $ex ) {
23     echo $ex->getMessage();
24 }
25
26
27 switch($action){
28
29     case "Ajouter":
30
31
32         echo "Appuyé sur le bouton Ajouter";
33         break;
34     case "Modifier":
35         echo "Appuyé sur le bouton Modifier";
36         break;
37     case "Annuler":
38         echo "Appuyé sur le bouton Annuler";
39         break;
40 }
41
42
43
```

Connexion à la base de données en utilisant PDO et affiche un message d'erreur de connexion le cas échéant :

```
1 <?php include("../template/header.php");?>
2 <?php
3
4 $txtID=(isset($_POST['txtID']))?$_POST['txtID']:"";
5 $txtNom=(isset($_POST['txtNom']))?$_POST['txtNom']:"";
6 $txtImage=(isset($_FILES['txtImage']['name']))?$_FILES['txtImage']['name']:"";
7 $action=(isset($_POST['action']))?$_POST['action']:"";
8
9 echo $txtID."<br/>";
10 echo $txtNom."<br/>";
11 echo $txtImage."<br/>";
12 echo $action."<br/>";
13
14 $host="localhost";
15 $bd="ecfecoit";
16 $user="root";
17 $password="";
18
19 try {
20     $conexion=new PDO("mysql:host=$host;dbname=$bd",$user,$password);
21     if($conexion){ echo "connecté au système";}
22 } catch (Exception $ex) {
23     echo $ex->getMessage();
24 }
25
26
```

Parcourir...

Aucun fichier sélectionné.

Ajouter

Modifier

Annuler

ID	Nom	Image	action
2	apprendre PHP	image.jpg	selectionner effacer

Je me connecte à la base de données :

```
1 <?php include("../template/header.php");?>
2 <?php
3
4 $txtID=(isset($_POST['txtID']))?$_POST['txtID']:"";
5 $txtNom=(isset($_POST['txtNom']))?$_POST['txtNom']:"";
6 $txtImage=(isset($_FILES['txtImage']['name']))?$_FILES['txtImage']['name']:"";
7 $action=(isset($_POST['action']))?$_POST['action']:"";
8
9 echo $txtID. "<br/>";
10 echo $txtNom. "<br/>";
11 echo $txtImage. "<br/>";
12 echo $action. "<br/>";
13
14 $host="localhost";
15 $bd="ecfecoit";
16 $user="root";
17 $password="";
18
19 try {
20     $connexion=new PDO("mysql:host=$host;dbname=$bd",$user,$password);
21     if($connexion){ echo "connecté au système";}
22 } catch (Exception $ex) {
23     echo $ex->getMessage();
24 }
25
26
27 switch($action){
28
29     case "Ajouter":
30         //
31         $sentenceSQL= $connexion->prepare("INSERT INTO `formations` (`id`,`nom`,`image`) VALUES (NULL, 'HTML', 'image.jpg');");
32         $sentenceSQL->execute();
33         echo "Appuyé sur le bouton Ajouter";
34         break;
35     case "Modifier":
36         echo "Appuyé sur le bouton Modifier";
37         break;
38     case "Annuler":
39         echo "Appuyé sur le bouton Annuler";
40         break;
41 }
42 }
```

Recevoir des actions « ajouter » :

```
1 <?php include("../template/header.php");?>
2 <?php
3
4 $txtID=(isset($_POST['txtID']))?$_POST['txtID']:"";
5 $txtNom=(isset($_POST['txtNom']))?$_POST['txtNom']:"";
6 $txtImage=(isset($_FILES['txtImage']['name']))?$_FILES['txtImage']['name']:"";
7 $action=(isset($_POST['action']))?$_POST['action']:"";
8
9 include("../config/bd.php");
10
11 switch($action){
12
13     case "Ajouter":
14         //
15         $sentenceSQL= $connexion->prepare("INSERT INTO formations (nom,image ) VALUES (:nom,:image);");
16         $sentenceSQL->bindParam(':nom',$txtNom);
17         $sentenceSQL->bindParam(':image',$txtImage);
18         $sentenceSQL->execute();
19         echo "Appuyé sur le bouton Ajouter";
20         break;
21     case "Modifier":
22         echo "Appuyé sur le bouton Modifier";
23         break;
24     case "Annuler":
25         echo "Appuyé sur le bouton Annuler";
26         break;
27 }
28
29
30 ?>
```
